

C.I.S. MAPS Central Asia

Over 350 maps scanned at high resolution, covering Central Asia Republics. They complete the previous set of over 1060 more western. The date of issue and updates are recent.

The original scale vary from 1/100.000, 1/200.000 and 1/500.000. The coordinate system is based on the Pulkovo 1942 system and Gauss grid. The necessary grid lines exist on the maps.

Depending on the area the available features can be: cities, villages, population, roads, railroads, airports, rivers, canals, lakes, coastline, boundaries, elevation, contour lines, water depth, wells, energy lines.

Central Asia	160 maps (500k)
	185 maps (100k)
K39	12 maps (200k)
